

RiverWare Account Subordination Viewer / 9-13-2007

This Qt-implemented dialog was developed for Water Rights Accounting (WRA) to show special "subordination" relationships between pairs of Accounts. A Subordination Relationship is used to override the relative priorities of Accounts which would otherwise be based on Account seniority (represented by Accounts' "Priority Dates").

The Account Subordination Viewer is available from the Water Accounts Manager dialog, under the System menu ...

Notice: These screenshots are from a model provided by Brad Vickers, and should probably not be used in public documentation.

Account Subordination (overriding the relative priority between Accounts based on Priority Date) is configured within the Account Slot:

"Subordinated Rights" (a List Slot).

The "Subordinated Rights" Account Slot is visible only on Water Accounts with the **"Subordination of Right" Method** set to **"Subordinate Senior Rights"**.

Note that the subordination relationships were added by Phil Weinstein, so are arbitrary.

Note that this Open List Slot screenshot is missing the name of the Slot's Account. [See Gnats 4316](#).
